Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1 and 8, Applicant indicate a method and system for locating a mobile node in a partially synchronized wireless network, in steps of "measuring a first received signal strength of the third message... estimate a location of the mobile node"; "a third stationary node...to estimate a location of the mobile node" are unclear. Since measuring a first and second received signals strength from two different stationeries. Applicant does not mention the operation time. Are both two stationeries received signal strength as the same time or in different time with the same third message? These functions could be affect the accuracy of the estimating a location of the mobile node based on the inaccurate occurs in the first, second and third sets coordinates. Extension revision is required.

The dependency claims are not mentioned, and also rejected based on the rejection of the parent claims.

Allowable Subject Matter

3. Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2863

Since the prior art of record does not disclose the claimed combination as recited in the claims to estimate a location of the mobile node based on the intersecting (determined) possible coordinates of the first, second and third sets (created).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The reference of Belcea (US 6,728,545) discloses system and method for computing the location of a mobile terminal in a wireless communications network.

The reference of Omae et al (US 20040017775) discloses Packet transmission control apparatus, mobile control node, packet communication method, and communication system.

The reference of Belcea (US 20040005902) discloses system and method for correcting the clock maintaining the synchronization of low quality wireless networks.
